**DETAILED ACTION**

**Lack of Unity**

1. Claims 1-20 are pending in the application.
2. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions, which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 1-11, drawn to a process for separation and purification of a crude mixture comprising hydroquinone and resorcinol.

Group II, claims 12-20, drawn to a plant for the separation and purification of said crude mixture.

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: There is no special technical feature that unites Group I with Group II. Group I does not require the particulars of Group II in that the process for separating and purifying a crude mixture of hydroquinone and resorcinol can be carried out with rectification equipment known in the art, such as that disclosed in FR 2 467 155 A. Thus, unity of invention is lacking for Groups I and II.

Art Unit: 1621

A telephone call was made to Teresa Stanek Rea on 9/30/03 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
